PROFESSIONAL EXPERIENCE

Streams Tech, Ltd.

August 2024 – Present

Associate Software Engineer

Primarily worked as a backend developer, contributed to multiple projects and RnDs such as,

- **SpendPlan:**
 - Engineered a custom type-safe RedisJSON query engine by translating LINQ expressions to JSONPath at runtime.
 - Improved query response time by introducing caching in the query custom engine.
 - Eliminated raw string queries, achieving compile-time safety and faster query development.
 - Improved maintainability significantly by refactoring legacy backend modules.
- **Flat Suite:**
 - Architected and implemented core backend features (C# .NET 8, PostgreSQL, Redis).
 - Built pluggable AWS S3/local media storage using Factory pattern and reusable rate-limited SMS OTP service.
 - Developed Blazor Server admin panel for subscription and coupon management.
 - Prototyped AI-driven universal data importer for legacy migration using OpenAI, Deepseek, and Landing AI.

EDUCATION

Islamic University of Technology (IUT) — Gazipur, Bangladesh

B.Sc. in Software Engineering

January 2020 – June 2024

Projects

ProjViz – Real-Time 3D Room Color Visualizer

Solo R&D project demonstrating high-performance WebGL capabilities.

- Built a photorealistic browser-based visualizer with instant material/color changes using Three.js.
- Achieved constant 60 FPS on laptops and smooth performance on mobile devices.

DSE Stock Scraper – Real-Time Bangladesh Stock Market Data Pipeline

Personal project (forked & modernized an outdated scraper).

- Updated and migrated legacy Node.js scraper to latest Node 20+ LTS and modern async/await patterns.
- Dockerized the entire pipeline for reproducible, one-command deployment.

Spana – Static Code Metrics Analyzer for C#

University term project

- Developed a Roslyn Source Generator tool that automatically computes Cyclomatic Complexity, LOC, DIT, CBO, LCOM, God Methods, and God Classes.
- Delivered per-class and project-wide reports via console output.

SKILLS & OTHER

Programming: C# · Java · JavaScript · Node.js · Python · SQL

Backend/Frameworks: .NET 8 · ASP.NET Core · EF Core · Redis · PostgreSQL · Blazor

Tools & Platforms: Docker · Git · Linux
